4 INTRODUCERS

**COOK ACCESS PLUS®**

**LUER LOCK HIGH-VOLUME INFUSION INTRODUCER WITH HEMOSTASIS VALVE SET AND TRAY**

Used to introduce balloon, electrode, closed or non-tapered end and other catheters.

- Cook Access Plus® Introducers feature a uniquely fabricated sheath designed to provide maximum flexibility without kinking or compression.
- Gradual tapering of dilator reduces transition from wire guide to sheath for ease of insertion.
- The sheath accepts catheters with diameters of 7.0-9.0 French.
- Recommended for pulmonary artery balloon catheters larger than 7.0 French.
- The hemostasis valve prevents blood reflux and air aspiration and minimizes compression of thermodilution catheters.
- Luer lock fitting on valve assembly prevents dilator slippage during insertion while providing secure fixation of sterility sleeve.
- Large bore side-arm design is ideally suited for unimpeded fluid infusion.

**The maximum diameter of the instrument or catheter to be introduced should be determined to insure its passage through the sheath.<sup>1</sup>**

Supplied sterile in peel-open packages. Intended for one-time use.

ORDER NUMBER	'INTRODUCER		WIRE GUIDE		SHEATH	Remarks	Global Product Number
	French Size	Diameter	Tip		Length		
<b>Set</b>							
C-FYBLI-9.0-35-J-10.5	9.0	.035 inch	straight and 3 mm "J"		10.5 cm	Introducer with Coons taper	G09321
<b>Tray<sup>2</sup></b>							
C-FYBLIY-9.0-35-J-10.5	9.0	.035 inch	straight and 3 mm "J"		10.5 cm	Introducer with Coons taper	G09313

<sup>2</sup>Tray consists of items shown above and the following items: 25 gage needle, 22 gage needle, lidocaine, povidone-iodine swabsticks, fenestrated drape, gauze sponges, disposable syringe, suture with needle, povidone-iodine ointment, CSR wrap and prep tray.

Patent Numbers 4,705,511; 4,657,772

## COOK ACCESS PLUS®

### LUER LOCK HIGH-VOLUME INFUSION INTRODUCER TRAY

Used for high-volume replacement of fluids and introduction of balloon, electrode, closed or non-tapered end and other catheters.

- Cook Access Plus® Introducers feature a uniquely fabricated sheath designed to provide maximum flexibility without kinking or compression.
- Luer lock fitting on the dilator prevents slippage during introduction over the wire guide.

**The maximum diameter of the instrument or catheter to be introduced should be determined to insure its passage through the sheath.<sup>1</sup>**

Supplied sterile in peel-open packages. Intended for one-time use.

ORDER NUMBER	<sup>1</sup> INTRODUCER	WIRE GUIDE		SHEATH	DILATOR	Global Product Number
	French Size	Diameter	Tip	Length	Type	
<b>Tray<sup>2</sup></b>						
<b>C-FSSIY-9.0-35-J-13.0</b>	9.0	.035 inch	straight and 3 mm "J"	13.0 cm	Coons	<b>G09467</b>

<sup>2</sup>Tray consists of items shown above and the following items: 25 gage needle, 22 gage needle, lidocaine, povidone-iodine swabsticks, fenestrated drape, gauze sponges, disposable syringe, suture with needle, povidone-iodine ointment, CSR wrap and prep tray.

Patent Numbers 4,705,511; 4,657,772

6 INTRODUCERS

**INTRO DEUCE®**

**LUER LOCK DOUBLE LUMEN INTRODUCER WITH HEMOSTASIS VALVE TRAY**

Used to introduce balloon, electrode, closed or non-tapered end and other catheters.

- The sheath incorporates two separate, noncommunicating vascular access lumens within a single catheter body.
- The large lumen of the sheath accepts catheters with diameters of 7.0-8.5 French.
- Small lumen of the sheath allows venous pressure monitoring, blood sampling and infusion of drugs and fluids.
- Small lumen equivalent size is 18 gage.
- Exit port of small lumen is spaced one centimeter from end of sheath.
- The hemostasis valve prevents blood reflux and air aspiration and minimizes compression of thermodilution catheters.
- Luer lock fitting on valve assembly prevents dilator slippage during insertion while providing secure fixation of sterility sleeve.
- Large bore side-arm design is ideally suited for unimpeded fluid infusion.

**The maximum diameter of the instrument or catheter to be introduced should be determined to insure its passage through the sheath.<sup>1</sup>**

Supplied sterile in peel-open packages. Intended for one-time use.

ORDER NUMBER	INTRODUCER	WIRE GUIDE		SHEATH	Global Product Number
	French Size	Diameter	Tip	Length	
<b>Tray<sup>2</sup></b>					
<b>C-DYBLIY-8.5-35-J-10.5</b>	8.5	.035 inch	straight and 3 mm "J"	10.5 cm	<b>G26909</b>

<sup>2</sup>Tray consists of items shown above and the following items: 25 gage needle, 22 gage needle, lidocaine, povidone-iodine swabsticks, fenestrated drape, gauze sponges, disposable syringe, disposable scalpel, suture with needle, povidone-iodine ointment, CSR wrap and prep tray.

## CHECK-FLO® PERFORMER® ACCESSORY ADAPTER

- The accessory adapter can be connected to the proximal end of any Desilets-Hoffman sheath.
- The self-adjusting valve in the adapter prevents blood reflux and air aspiration during the introduction of catheters or instruments.
- The side-connection line can be used for flushing or as a second infusion line.

Supplied sterile in peel-open packages. Intended for one-time use.

ORDER NUMBER	Accepts	Remarks	Global Product Number
<b>C-CFM-100</b>	3.0 thru 9.0 French	Check-Flo® Performer® valve to male Luer lock with side-connection line and three-way stopcock	<b>G05149</b>

Patent Pending

## 8 INTRODUCERS

### STERILITY SLEEVE

Used to help maintain the sterility of catheters or other instruments introduced through Check-Flo® Performer® and Tuohy-Borst sheaths. Accepts catheters or other instruments 3.0 to 9.0 French. Supplied sterile in peel-open packages. Intended for one-time use.

ORDER NUMBER	Length	Used With	Global Product Number
<b>C-SPS-65-CK</b>	65 cm	Check-Flo® Performer® sheath	<b>G03611</b>

U.S. Patent Numbers 4,551,137; 4,634,433

## PEEL-AWAY® INTRODUCER SETS

Used for percutaneous introduction of balloon, electrode and closed or non-tapered end catheters for vascular and non-vascular use.

- Applications include placement of Permanent Pacemaker Leads, TPN Catheters, Silicone Central Venous Catheters, Hemodialysis Catheters, Tenckhoff Peritoneal Dialysis Catheters, Chest Drainage Tubes and Gastrostomy Catheters.

- The dual knobs allow the sheath to be peeled away and removed.

**The maximum diameter of the instrument or catheter to be introduced should be determined to insure its passage through the sheath.<sup>1</sup>**

Supplied sterile in peel-open packages. Intended for one-time use.
